

MASTER OF ARTS IN THE FIELD OF INTERNATIONAL AFFAIRS

The field of international affairs addresses the key challenges and opportunities that affect the lives of billions of our fellow human beings. Globalization of economic, political, social, and cultural activity has created new opportunities and challenges for tomorrow's leaders in international affairs. Rarely has there ever been an uncertain world, in which the need for increased international understanding and cooperation has become essential.

Course offerings in the program draw heavily on the various academic departments of the university. Students in the MA in international affairs program begin with a core field of three to five courses in political science, economics, and history and move on to major fields focusing on global issues or regional areas. Skills courses and a capstone course on a contemporary policy issue connect academic coursework directly to practical applications.

The MA program in international affairs makes the most of the Elliott School's location within a few blocks of the White House, the U.S. Department of State, the World Bank, and the International Monetary Fund.

Visit the program website (<https://elliott.gwu.edu/international-affairs-masters/>) for additional information.
